

Capturing FALL

You will be turning in FOUR images.

Use the techniques you've learned thus far with composition, DOF, Framing the Subject, Leading Lines, and don't forget about your post-production work (edits in Camera Raw & Photoshop).

Turn in at least **FOUR images**:

(1) TWO images that captures the colors of FALL.

Fall is when we start to see dramatic color changes in the leaves, so capture some vibrant colored imaged of this.

(2) TWO images that captures something that makes you think of FALL other than the colors.

What does fall mean to you? Capture some images of what fall means to you. For some it's time to change to a warmer wardrobe. For others it's Thanksgiving dinner. And still others it's all about pumpkins. What ever it is, your image should reflect this.

Please convert all images you send me into JPG!

(Do not turn in CR2 files! That just tells me you did ZERO editing.)
